OBJECTIVE

Third-year Information Science & Engineering student with hands-on experience building AI-powered and data-driven applications in Python, MySQL and JavaScript. Seeking an SDE Intern role to apply strong problem-solving and development skills in a real-world engineering team.

EDUCATION

B.E., Information Science & Engineering

2025 – 2028

University Visvesvaraya College of Engineering (UVCE), Bengaluru | 3rd Year (5th Semester) | CGPA: 8.3 / 10

EXPERIENCE

Summer Intern

Honeywell

May 2026 – July 2026

- Worked with engineering teams on real-world software tasks in a professional environment.

PROJECTS

HireRank-AI

Python | LLM

- Built an AI-powered tool that uses Large Language Models to analyze and rank candidate resumes against job requirements.
- Automated screening steps to reduce manual review effort for recruiters.

Vehicle Rental System(DBMS)

Python | MySQL | HTML/CSS/JS

- Developed a full-stack vehicle rental platform to manage vehicle inventory, customer bookings, and rental transactions with real-time availability checks..
- Designed a normalized MySQL schema (5+ tables) with primary/foreign keys, joins, and triggers for booking validation and implemented CRUD operations with Flask and secure authentication.

Personal Finance Tracker

Python

- Created an application to record income and expenses, with data stored and queried in a MySQL database.
- Implemented category-wise tracking to give users a clear view of their spending.

Amazon Clone (Frontend)

HTML | CSS | JavaScript

- Built a fully responsive e-commerce UI with product catalog, product detail pages, and shopping cart replicating Amazon's core user flow.
- Implemented client-side functionality for add-to-cart, quantity updates, and price calculation using JavaScript and LocalStorage.

TECHNICAL SKILLS

Languages: Python, C++, C, JavaScript, SQL

Core CS: Data Structures & Algorithms (DSA)

Web: HTML, CSS, JavaScript

Database: MySQL

GEN AI : Large Language Models (LLMs), prompt engineering **Tools:** Git, GitHub
